Projects

TradExpress, *A frontend project* 

- This is a frontend project built using Html, CSS, Reactjs, and Bootstrap.
- It's a trading platform landing page called TradExpress, where a user can sign up, buy and sell cryptocurrency.
- Also, an API was fetched in order for a user to see the real-time current market price of all the top cryptocurrencies.

Post List, *A full stack web project* 

- A project build using Html, CSS, Bootstrap, and Reactjs in our front end, while we used Python and Django at our backend.
- This project was our final project during my course of study, which consist of RESTful API. In this project, a user can post his/her blog.

Spatial variability of two major FM Radio Stations, *within Ogbomosho* 

- In this study, an effective field strength measurement of the channel across Ogbomosho, Oyo state, was conducted as far as road accessibility permits. Other necessary radio communication
- parameters on the MHz band such as line of sight, elevation and
- geographical coordinates of the various data points were also determined.

Professional Experience

Lab Technician, *Oluwaseun Medical Centre*

2019 – 2020

- Designed and conducted lab tests according to standard procedures.
- Conducted tests on new products or experimental processes.
- Administrative tasks such as maintaining notebooks, documenting procedures, and preparing orders.

Ogbomosho, Nigeria
